ACADEMIC DETAILS

Year	Degree/Exam	Institute	GPA/Marks(%)
Sep, 2022 - Present	B.TECH in Computer Science	Graphic Era Hill University Dehradun	8.61/10
2022	C.B.S.E	S.G.R.R. public school(Talab Branch)	91.20 %
2020	C.B.S.E	S.G.R.R. public school(Talab Branch)	93.00 %

EXPERIENCE

- **Software Engineering Intern – Microsoft** (July 2024 – September 2024)
 - Automated end-to-end CRUD operations for Azure RecoveryServices Vault using C#, .NET 8, and Azure SDK, reducing manual effort and improving reliability.
 - Designed and implemented a modular, agent-based architecture that improved scalability, maintainability, and adaptability of automation workflows.
 - Integrated OpenAPI/Swagger schema parsing to dynamically generate and validate payloads, ensuring accurate API interaction across versions.
 - Developed a robust error-handling and self-healing system leveraging a knowledge base of known issues, enabling consistent recovery from real-world Azure API bugs.
 - Built history tracking and logging mechanisms to surface undocumented behaviors, detect inconsistencies, and contribute to API quality improvement.
 - Collaborated in an agile team environment, presented progress to mentors, and incorporated feedback to refine solutions.
 - Authored detailed technical documentation to support onboarding, knowledge transfer, and long-term scalability.

PROJECTS

- **AI-Powered Error Debugging Compiler** (May, 2025 - June, 2025) : Developed an AI-Powered Error-Debugging Compiler that assists programmers—especially beginners—in identifying and resolving syntax-related issues. Integrated rule-based error detection with AI language models to provide clear, human-friendly feedback, improving usability over traditional compilers with ambiguous error messages.
- **Billing Management System** (Sep, 2024 - Nov, 2024) : A billing software that helps shopkeepers manage digital records of sales/purchases and generate bills using Java (Swing, AWT) with MySQL database connectivity.
- **Sentiment Analysis On Youtube Comments** (May, 2024 - Aug, 2025) : Extracted comments from YouTube videos and performed sentiment analysis to categorize them as positive, negative, or neutral. Using machine learning algorithms, I trained and tested a model to effectively classify sentiments, showcasing the application of ML techniques in natural language processing and audience sentiment analysis.
- **Ticket Management System** (Apr, 2023 - June, 2023) : Built a Ticket Management System using Python (Tkinter) and SQL for efficient issue tracking and resolution. Users raise tickets; admins assign them to experts. Features include user-friendly UI and database integration.

TECHNICAL SKILLS

- **Programming Languages:** C#, Python (proficient), C (proficient), C++ (proficient), Java.
- **Frameworks/Platforms:** .NET 8, .NET Core
- **Cloud and DevOps:** Azure SDK, Azure REST APIs
- **Web Development:** HTML, CSS, Javascript
- **Database Management:** SQL

CORE COMPUTER SCIENCE SKILLS

- Data Structures and Algorithms
- OOPS Concept in C++ and Java

STRENGTHS

- Good Adaptability
- Team Collaboration
- Quick Learning Ability
- Consistent
